

ITALTELAI — MORINI F. ENGINE — FRANZONI FORK

SET YOUR PACE WITH PACER

If you relax and travel at an easy pace, you'll understand how "GETTING THERE CAN BE AS MUCH FUN AS BEING THERE."

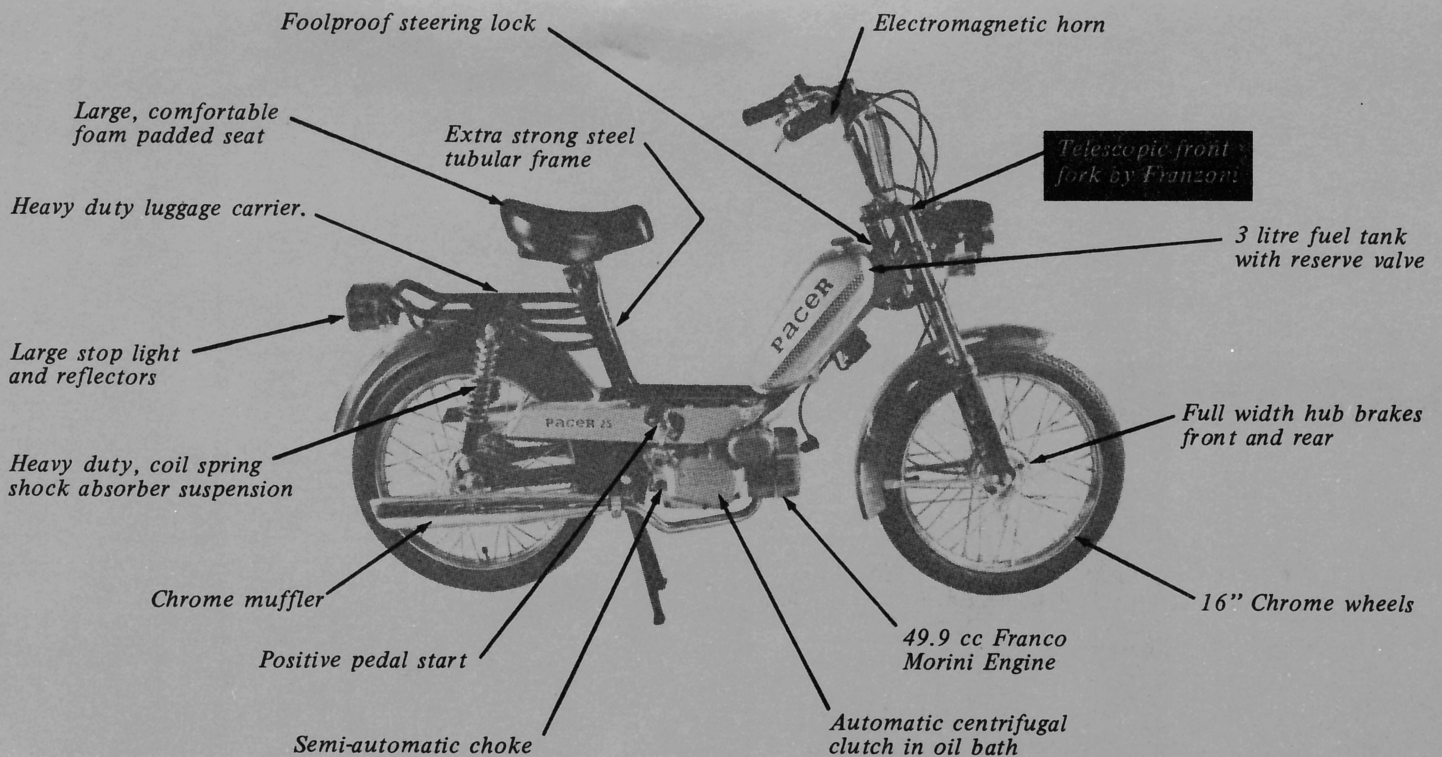

PACER MOPEDS are designed for fun but, the factors that make PACER stand out among other mopeds is fun, combined with reliability, safety and comfort.

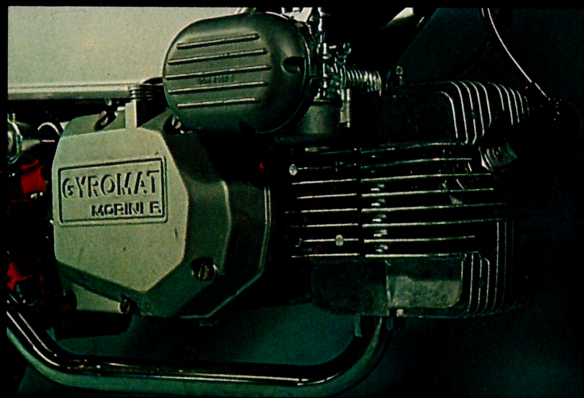

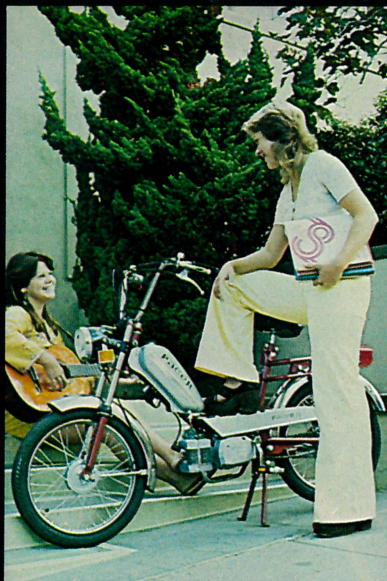

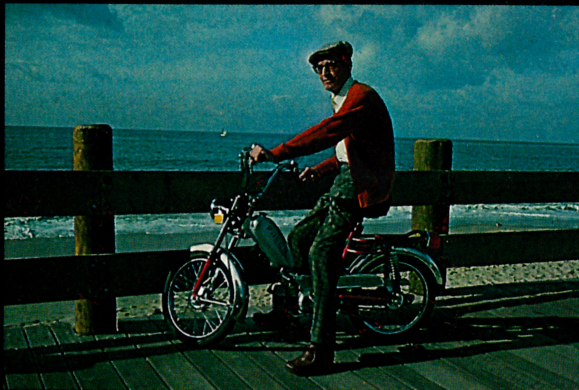

An over-sized, FOAM PADDED SEAT combined with HEAVY DUTY SPRING SUSPENSION AND A PRECISION BALANCED FRAME assures you of a steady comfortable ride.

The PACER is powered by the famous 49.9 cc FRANCO MORINI ENGINE with a TELESCOPIC FRONT FORK BY FRANZONI, both of which are unsurpassed in mechanical stability, so that you can be assured of smooth, reliable service with plenty of power for hill climbing.

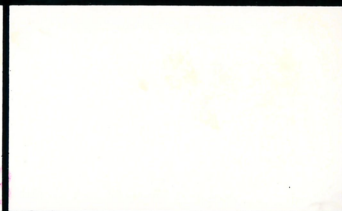

Most importantly, the PACER is constructed by the same craftsmen who have made Italy famous for fine motorized vehicles.

So when you decide to change your pace, remember, SET YOUR PACE WITH PACER.
